PSP/RTKL Request N° 2019-0668

Dear Ms. Best:

On June 24, 2019, the Pennsylvania State Police (PSP) received your request for information pursuant to the Pennsylvania Right-to-Know Law (RTKL), 65 P.S. §§ 67.101 - 3104, wherein you state:

Pursuant to the Pennsylvania Right to Know Act, I hereby request the following records:

Records mentioning, describing or generated as a result of the 8 May 2015 Roll Call Release IA-0181-15 (which was designed to be shared widely with law enforcement) from the Department of Homeland Security's Office of intelligence and Analysis (I&A) in conjunction with the Federal Bureau of Investigation, titled "Criminal Hackers Target Police to Protest Perceived injustices," as well as records otherwise responding or reacting to the issues raised in it.

I am a member of the news media and request classification as such. I have previously written about the government and its activities, with some reaching over 100,000 readers in outlets such as Gizmodo, MuckRock, Motherboard, Property of the People, Unicorn Riot, and the Outline, among others. As such, as I have a reasonable expectation of publication and my editorial and writing skills are well established. In addition, I discuss and comment on the files online and make them available through non-profits such as the library Internet Archive and the journalist non-profit MuckRock, disseminating them to a large audience. While my research is not limited to this, agreed deal of it, including this, focuses on the activities and attitudes of the government itself.

Under the RTKL, a written response to your request is due on or before July 1, 2019.

Under the provisions RTKL section § 67.902(b)(2), you are hereby notified that your request is being reviewed and the PSP will require up to an additional 30 days, i.e., until July 31, 2019, in which to respond to your request. Should your request be granted, the total for the estimated or actual fees owed, if any, will be included in our subsequent response. The reason for requiring additional time for a final response is checked below:

- Compliance with your request may require the redaction of certain information that is not subject to access under RTKL.
- Your request requires retrieval of one or more records that are stored at a remote location.
- A response by the mailing date of this letter could not be accomplished due to bona fide staffing limitations. In particular, \_\_\_\_\_.
- Your request is under legal review, which is necessary to determine whether a requested record is a "public record" for purposes of the RTKL.
- Your compliance with the following agency policies is required for access to the record(s): \_\_\_\_\_
- You must pay the applicable fees authorized by the RTKL.

X The extent or nature of the request precludes a response within the required time period.

Should you have any questions regarding this letter, please contact the undersigned.

Sincerely yours,

William A. Rozier, J.D.

To Whom It May Concern:

RECEIVED  
RIGHT-TO-KNOW LAW OFFICE  
SUBPOENA UNIT  
2019 JUN 24 A 6:58

Pursuant to the Pennsylvania Right to Know Act, I hereby request the following records:

Records mentioning, describing or generated as a result of the 8 May 2015 Roll Call Release IA-0181-15 (which was designed to be shared widely with law enforcement) from the Department of Homeland Security's Office of Intelligence and Analysis (I&A) in conjunction with the Federal Bureau of Investigation, titled "Criminal Hackers Target Police to Protest Perceived Injustices," as well as records otherwise responding or reacting to the issues raised in it.

I am a member of the news media and request classification as such. I have previously written about the government and its activities, with some reaching over 100,000 readers in outlets such as Gizmodo, MuckRock, Motherboard, Property of the People, Unicorn Riot, and The Outline, among others. As such, as I have a reasonable expectation of publication and my editorial and writing skills are well established. In addition, I discuss and comment on the files online and make them available through non-profits such as the library Internet Archive and the journalist non-profit MuckRock, disseminating them to a large audience. While my research is not limited to this, a great deal of it, including this, focuses on the activities and attitudes of the government itself.

As my primary purpose is to inform about government activities by reporting on it and making the raw data available, I request that fees be waived.

The requested documents will be made available to the general public, and this request is not being made for commercial purposes.

In the event that there are fees, I would be grateful if you would inform me of the total charges in advance of fulfilling my request. I would prefer the request filled electronically, by e-mail attachment if available or CD-ROM if not.

Thank you in advance for your anticipated cooperation in this matter. I look forward to receiving your response to this request within 5 business days, as the statute requires.

Sincerely,

Emma Best

# ROLL CALL RELEASE

INTELLIGENCE FOR POLICE, FIRE, EMS, AND SECURITY PERSONNEL

8 May 2015

## (U//FOUO) Criminal Hackers Target Police to Protest Perceived Injustices

(U//FOUO) Disruptive cyber attacks by criminal hackers—primarily distributed-denial-of-service (DDoS) attacks—targeting local law enforcement websites have increased since August 2014. We judge that this is almost certainly a result of the heightened coverage surrounding the alleged use of excessive force by law enforcement and an increased focus on incidents of perceived police brutality. The primary impact from the majority of these attacks has been the temporary disruption of the targeted public-facing websites.

- » (U//FOUO) In 2014, the Multi-State Information Sharing and Analysis Center (MS-ISAC) observed 53 separate incidents of criminal hackers conducting cyber operations against state and local entities in response to incidents of alleged use of excessive force by law enforcement. The majority of these incidents were low to moderate in effect, most frequently resulting in temporary disruption to targeted websites.
- » (U//FOUO) On the morning of 30 December 2014, unknown criminal hackers disabled a Midwestern police department's public website using a DDoS attack. A post later that morning on a US social-networking site containing the hashtag "#BlackLives Matter" announced that the targeted website was down. The disabling of this website was the third successful attack to disable a law enforcement website in the state within a week—the attacks were limited to the temporary disablement of targeted websites, according to DHS field reporting.
- » (U//FOUO) A criminal hacker using the moniker (at)DigitaShadow claimed responsibility on a US social-media site for disrupting access to a Northwestern city police department's website in early December 2014. The DDoS attack, which lasted approximately 10 minutes, prevented the department's in-car terminals from transmitting or receiving traffic, including 911 dispatch requests, according to FBI reporting.

(U) Figure 1. Criminal Hackers Targeting Police

### (U//FOUO) MS-ISAC Distributed-Denial-of-Service Mitigation Recommendations

(U) Proactive protections include:

- » (U) Establish connections with multiple Internet service providers (ISPs) for redundancy,
- » (U) Ensure service-level agreements with ISPs contain provisions for DoS prevention (such as IP address rotation),
- » (U) Conduct rate-limiting of traffic at the network perimeter, and
- » (U) Create backup, remote-site network infrastructure using multiple addressing schemes.

(U) Reactive protections include:

- » (U) Execute ISP address rotation,
- » (U) Block source IP addresses generating DoS traffic at enterprise boundary or within ISP infrastructure, and
- » (U) Acquire increased bandwidth capability from the ISP.

(U//FOUO) See MS-ISAC's "Guide to DDoS Attacks" for additional information:  
[http://msisac.cisecurity.org/resources/reports/documents/GuidetoDDoSAttacks\\_000.pdf](http://msisac.cisecurity.org/resources/reports/documents/GuidetoDDoSAttacks_000.pdf).

### (U) Reporting Computer Security Incidents

(U) To report a computer security incident, either contact US-CERT at 888-282-0870, or go to <https://forms.us-cert.gov/report/> and complete the US-CERT Incident Reporting System form. The US-CERT Incident Reporting System provides a secure, web-enabled means of reporting computer security incidents to US-CERT. An incident is defined as a violation or imminent threat of violation of computer security policies, acceptable use policies, or standard computer security practices. In general, types of activity commonly recognized as violating typical security policies include attempts (either failed or successful) to gain unauthorized access to a system or its data, including personally identifiable information; unwanted disruption or denial of service; the unauthorized use of a system for processing or storing data; and changes to system hardware, firmware, or software without the owner's knowledge, instruction, or consent.

IA-0181-15

(U) Prepared by the Office of Intelligence and Analysis (I&A). Coordinated with the FBI. This product is intended to provide cybersecurity awareness to federal, state, local, and private sector first responders in matters that can affect personnel and network security of their respective organizations.

(U) Warning: This document is UNCLASSIFIED//FOR OFFICIAL USE ONLY (U//FOUO). It contains information that may be exempt from public release under the Freedom of Information Act (5 U.S.C. 552). It is to be controlled, stored, handled, transmitted, distributed, and disposed of in accordance with DHS policy relating to FOUO information and is not to be released to the public, the media, or other personnel who do not have a valid need to know without prior approval of an authorized DHS official. State and local homeland security officials may share this document with authorized critical infrastructure and key resource personnel and private sector security officials without further approval from DHS.
